

NDSWA and Miracle Solutions

The New Delhi Social Workers' Association (NDSWA) and Miracle Solutions are dedicated to contributing and creating a positive impact on the society and nation. They believe that by investing in social service, they can create and foster a healthy society. As an active facilitator since 1948, they have encouraged, designed, and executed projects and camps for the betterment of the society in the fields of healthcare, water, better hygiene and living conditions, sports, education and adult literacy, women empowerment, and sensitizing people about their basic and fundamental rights. The NDSWA and Miracle Solutions have found overwhelming patronage from political leadership and strong logistics support from block leadership and it has continued since the beginning. This has made significant difference to the success of the projects.

While the NDSWA is focussed on doing all charitable and philanthropic

activities, Miracle Solutions provides the professional edge to various event activities while getting engaged commercially. NDSWA, a registered and prominent NGO in Delhi, has been working closely with the government and the citizens for their societal development and upliftment, for the last six decades.

NDSWA Creates Environmental Awareness on World Environment Day 2018

India was the global host of the World Environment Day 2018. With 'Beat Plastic Pollution' as the theme for this year's edition, the world got together in India to combat single-use plastic pollution.

Dr Udit Raj, Hon'ble Member of Parliament (North West Delhi) with Mr Gaurav Grover, President of NDSWA along with the United Nations

Environment Programme (UNEP), organized a meaningful discussion to create more awareness on environment in New Delhi on June 2, 2018. Mr Gaurav Grover, President, NDSWA has also received a certificate from the Asia Book of Records for achieving the record for most foreigners meeting together for a pledge for a social cause on the same day.

During the occasion, Dr Udit Raj, Hon'ble Member of Parliament said, "We are so conservative that we need everything from our environment without considering how much we are exploiting the Earth and damaging the environment. Let us begin with ourselves to fight against the issue of single-use plastic which is polluting the environment. We need to bring the changes in our own pattern of consumption." Mr Gaurav Grover, President of NDSWA, said, "This initiative will give an encouragement to all citizens, that they should come forward and fight against the issue of single-use plastic which is polluting the environment. But this can only happen by individuals taking a step forward. World Environment Day is just a wake-up call for us to work for our environment." Ms Dia Mirza, famous actress and UN Environment Goodwill Ambassador for India said, "We are extremely optimistic that we can achieve a significant shift in human behaviour where through the advocacy that we all are involved with, we can help more people to recognize the consumption of single use of plastic and find ways to refuse the single use of plastics. Once we achieve this, we can find a better way to manage the plastic waste."
